

HARSH MISHRA

Full Stack Developer | MERN Stack Engineer | Founder, EduVistaa

9504242547 · niharshmishra@gmail.com · Patna, Bihar · github.com/Hun4er · linkedin.com/in/harsh-m-8178b6239

PROFESSIONAL SUMMARY

MERN stack developer and founder of **EduVistaa**, a live EdTech platform tackling a real access gap: India has 40,000+ colleges (AISHE, MoE) yet students physically visit fewer than 10 before making admission decisions. Built and shipped the full product end-to-end — React.js frontend, Node.js/Express.js backend, MongoDB Atlas, WebRTC-based live voice calling, and Brevo-powered OTP auth — deployed in production on Vercel and Render. Comfortable owning a product from architecture through deployment, with working exposure to Docker and CI-friendly cloud workflows. Currently pursuing an MCA at SRM University Delhi-NCR while scaling EduVistaa to Tier-2 and Tier-3 cities across India.

CORE SKILLS

Languages & Frameworks: JavaScript (ES6+), React.js, Redux Toolkit, Node.js, Express.js, HTML5, CSS3

Database: MongoDB, MongoDB Atlas, Mongoose

Real-Time & APIs: WebRTC, Socket.io, REST APIs, Third-Party API Integration

Auth & Security: JWT, Brevo OTP, Session Management

Cloud & DevOps: Vercel, Render, Docker, Heroku, Git

Tools: Postman, VS Code, Mapbox

PROFESSIONAL EXPERIENCE

Founder & Full Stack Developer — EduVistaa

Remote, India | 2024 – Present

- Identified and validated a real market gap — India has 40,000+ colleges (AISHE, MoE) yet students can physically visit fewer than 10 before making admission decisions — and built a product to close it.
- Architected and shipped the full platform solo: **React.js** frontend, **Node.js/Express.js** backend, and **MongoDB Atlas** cloud database, taking the product from concept to a publicly accessible, production-live site.
- Built a live voice-calling counselling feature using **WebRTC**, letting prospective students talk directly with current seniors from the college they're evaluating — the core differentiator of the platform.
- Implemented secure onboarding with **Brevo-powered OTP authentication** and **JWT** session handling for student and college-side accounts.
- Owned deployment and infrastructure end-to-end — frontend on **Vercel**, backend on **Render** — and manage the product roadmap while scaling outreach to Tier-2 and Tier-3 cities.

Live product: eduvistaa.vercel.app

KEY PROJECTS

EduVistaa — EdTech Platform — <https://eduvistaa.vercel.app/>

- Full-stack platform where students explore college campuses virtually and complete admissions entirely from home, cutting the need for costly in-person campus visits.
- Engineered live senior-student voice calling using **WebRTC** for real-time guidance before admission.
- Designed the MongoDB Atlas schema to support multi-college data, live sessions, and secure OTP-based onboarding at scale.

Stack: MERN · WebRTC · Brevo · JWT · Vercel · Render

Streaming Platform — Netflix-Inspired Clone

- Architected a full-stack video streaming platform with user authentication, dynamic content pulled from a third-party Movies/Videos API, and personalized watchlists.
- Built a responsive **React.js** frontend with **Redux Toolkit** for state management, delivering a smooth, Netflix-like browsing experience.
- Used **MongoDB Atlas** for scalable, cloud-based data storage and multi-user session management.

Stack: MERN · Redux Toolkit · MongoDB Atlas

Ride Booking App — Uber-Inspired Platform

- Architected a full-stack ride-hailing platform with real-time driver-passenger matching, live location tracking, and trip management — modelled on Uber's core booking flow.
- Built real-time communication using **Socket.io** for instant ride requests, driver acceptance, and live trip status updates between passengers and drivers.
- Integrated **Google Maps API** for live location tracking, route rendering, and distance/fare calculation across active trips.
- Implemented secure user and driver authentication with **JWT**, and designed MongoDB/Mongoose schemas for users, drivers, trips, and ride history.

Stack: React.js · Node.js · Express.js · MongoDB · Mongoose · Socket.io · Google Maps API · JWT · REST API · HTML · CSS

EDUCATION

Master of Computer Applications (MCA)

2025 – 2027 (Pursuing)

SRM University Delhi-NCR

Bachelor of Computer Application (BCA)

Graduated 2025 | GPA: 7.42 / 10

L.N. Mishra Institute of Economic Development, Patna

ADDITIONAL INFORMATION

Entrepreneurship: Founder of EduVistaa — currently scaling to serve students across Tier-2 and Tier-3 cities in India

Interests: Open-source contributions, hackathons, EdTech, product development, AI-powered applications

Languages: English (Professional), Hindi (Native)
